

Cristiano Raminelli was born in the south of Brazil in 1977. He received his B.Sc. degree in chemistry from the State University of Londrina in 1998. Studying at the University of São Paulo he received his M.Sc. degree in physical organic chemistry with Prof. Antonia T. Amaral in 2001 and his Ph.D. degree in organometallic chemistry with Prof. João V. Comasseto in 2005. He was a postdoctoral fellow at the Iowa State University working with Prof. Richard C. Larock from 2005 to 2006. Returning to Brazil he was a postdoctoral fellow at the University of São Paulo working with João V. Comasseto from 2007 to 2008. In 2008, he joined the chemistry faculty at the Federal University of Greater Dourados. In 2011, he moved to the Federal University of São Paulo where he is presently a professor of organic chemistry. His research interests include the development of methods involving benzyne chemistry and stereoselective synthesis of bioactive compounds.
