

Prof. Dr. Elisa S. Orth concluded her PhD in 2011, and after a post-doc, became professor/researcher at the Federal University of Paraná since 2012 where she coordinates her research group (Catalysis and Kinetic Group). Prof. Elisa Orth research is focused on the chemistry of organophosphates, present in agrochemicals and chemical warfare. The group has engaged in elucidating the mechanisms involved and benefiting from this for developing destruction processes and sensors.
